## Experience

---

### Manhattan District Attorney

New York, NY

*Software Developer*

Aug 2021 - Present

- Maintained and added features to one of the largest applications for tracking and managing cases.
- Worked with [Axon](#) API to download body camera footage and integrate with internal viewing/management application.
- Integrated NYPD body camera footage with [AssemblyAi](#) to transcribe thousands of hours of footage.
- Resolved incident/bug reports.

### Paysfer eMart

New York, NY

*Software Engineer Intern*

June 2021 - July 2021

- Built a responsive authentication page, navigation bar and header for the start-up ecommerce company.
- Wrote scripts which included creating an intersection observer to lazy load images on the home-page to reduce loading time.

### S.M.R Physics Research

New York, NY

*Research Assistant*

May 2019 - Sept 2019

- Assisted the Professor David Grier in pursuit of acoustic tweezers
- Built an echo proof area and took acoustic photographs to obtain an acoustic hologram to get a better understanding of acoustic waves interacting with objects.

## Projects

---

### FilmCritic

*React.js, Redux, Express.js, SQL*

Fullstack social media web-app for movie & show reviews which uses [themoviedb](#) for data on films/shows. Frontend uses Redux for state management and integrating with the backend API. Backend API made with Express, MySQL and uses JWT authentication.

### Sorting Visualizer

*React.js*

React web-app for visualizing different sorting algorithms. Variable sorting speed and data size. Implementations of Bubble, Quick, Heap, and Merge Sort.

### Alpaca Trading Bot

*Python*

Python trading bot that uses the [Alpaca](#) for paper trading. Implements an EMA to signal when to buy and sell.
